UVEOL
PROGETTIAMO CHIMICA

FOOD INDUSTRY CLEANERS

Cheese factories

The "UVEOL way" is based on 3 steps:

1. Analysis of customer needs
2. Analysis of procedure and critical factors (HACCP)
3. Innovative proposals for the solution of problems encountered

The aim is to provide the best available technologies. Every day in our Labs we focus on the research of new technologies and the development of products tailored to the customer. A big effort is devoted to the development of products from renewable sources.

Products for the processing phase

- No foaming alkaline degreasers
- Chlorine based degreasers
- High foam alkaline degreasers
- Chlorine based high foam alkaline degreasers
- Towels degreasers
- High foam neutral degreasers
- Descaling acids
- High foam descaling acids
- Quaternary ammonium salts based sanitizers
- Disinfectants approved by the Ministry of Health

Cheese ripening rooms

- No foaming alkaline degreasers
- Low foam cleaners with sanitizing power
- Odorless floor degreaser
- Ready to use universal cleaners
- Alcohol-based sanitizers

Products for the hygiene of the operators

- Hand-washing products approved by the Ministry of Health
- Sanitizer gel approved by the Ministry of Health
- Sanitizers for boots and shoes

Special treatments

- Products for odor elimination
- Products for the biological treatment of the sewage

Cargo cleaners

- Alkaline degreaser for pressure washer
- Sanitizers for refrigerated trucks
- Ready to use detergents and degreesers
