UVEOL
PROGETTIAMO CHIMICA

What we offer

UVEOL put products on the market one step beyond the state of the art.

High quality, bio based raw materials, several controls makes UVEOL a leading company in his field.

UVEOL works together with his products; our customers know that our technical assistance is always present with our total fluid management programs. UVEOL not only produces but also helps the customer on his challenges with an hard consulting activity.

Every day our technician suggest best practice, best products, best technologies orienting the customer toward the excellence.

UVEOL is an italian chemical company focused on **research and development, production and distribution** of his own products. **UVEOL** is also dedicated to the fluid management (detergents in industrial plants, metalworking fluids, neat cutting oils) with his technicians directly involved into the customer plants.

What we Produce

UVEOL is recognized as leader company in the production of chemicals dedicated to several industrial sectors.

Particular attention has been put into the development of bio-degradable fluids (lubricants, detergents, water treatment).

Another task of **UVEOL** is the capability to produce several different products tailored for unique needs of the customers. The curiosity, the expertise, the passion for challenges are the basis on which **UVEOL** is building the future.

Our challenge

UVEOL wants to become one of the best company dedicated to the total fluid management.

UVEOL wants to dedicate all his efforts to create a real green chemistry developing new bio based products with zero impact on human being and the whole environment.

To pursue those targets **UVEOL** is working hard in R&D to develop (also together with strong collaboration with University Labs) much more green products very easy to purchase and to use transforming restricted technologies in accessible tools.

ISO 9001

All the processes inside **UVEOL** are controlled by dedicated team and the whole organization is certificated by Afnor.

UVEOL guarantee the highest level of performances of his processes.

PRODUCT RANGE

Metal working fluids

Neat mineral based cutting oils

🌱 Neat bio based biodegradable cutting oils

Forming fluids (neat, emulsifiable and water soluble)

Emulsifiable metal working fluids (mineral, semi synthetics)

Emulsifiable bio based metal working fluids

Lubricants

Mineral oil based hydraulic fluids

PAO based hydraulic fluids

PAG based hydraulic fluids

Mineral oil based slide way fluids

Emulsifiable hydraulic oils

Mineral oil based gear box fluids

PAO based gear box fluids

PAG based gear box fluids

🌱 Ester based gear box fluids (BIO)

🌱 Fire resistant hydraulic fluids

🌱 BIO based hydraulic fluids

🌱 BIO based slide way fluids

Textile lubricants

Mineral oil based compressor oils

PAG based compressor oils

🌱 Ester based compressor oils (BIO)

Greases

Calcium soap based

Lithium soap based

Lithium soap plus EP additive

Lithium/calcium based

Aluminum soap based

PTFE based

Solvents

Isoparaffinic

De aromatized

Zero VOC blend

Not flammable

🌱 Vegetal and renewal based Blends

Industrial detergents

Alkali based no foam

Alkali based high foam

Alkali based mono component

Alkali based bi components

Spray detergents

Ultrasonic detergents

Tunnel detergents

Neutral no foam

Neutral high foam

🌱 BIO based

Descalers

Building sector descalers

Boat sectors descalers

Food sector descalers

Ready For Use Cleaners

Alkali based

Neutral

Acid based

🌱 BIO

Cleaners & Sanitizers

Chlorine based high foam

Low foam

Specific for animals

Multipurpose

Fuel additives

Diesel antifreeze

Biodiesel stabilizer

Diesel biocide

Stop water additive

Release Agents

🌱 BIO based graphite for hot forming (iron, brass, aluminum) high-medium.low viscosity

🌱 BIO based fluid for hot and cold forming

Water based releaser additive for welding

🌱 BIO based releaser for asphalt

🌱 BIO based releaser for concrete or reinforced concrete

🌱 BIO based emulsifiable releaser for formwork

🌱 BIO based neat releaser for formwork

Hand washers

Micro granules cream

Neutral cream for strong action

Liquid

Anticorrosion fluids

Hydrosoluble temporary anticorrosion fluid (boron and boron free)

Mineral oil based anticorrosion fluid (temporary medium high protection)

Waxy based high protection

Dewatering fluids

Water treatment

Flocculants

Sanitizers (biocide - anti algae)

Steam generator products

Detergents for circuits

Descalers for circuits

Heat exchangers cleaners

Aerosol Industrial absorbent

Oil absorbent

Water absorbent

Emulsions absorbent

Accessories

Refractometers

Volumetric mixers

Water softener

Research & Development

Only by this philosophy UVEOL believes that the things can change.
