

Products for the cleaning of metals and special parts

The "UVEOL way" is based on 3 steps:

- 1 Analysis of customer needs
- 2 Depth analysis of plants, products and procedures
- 3 Innovative proposals for the solution of problems encountered

The aim is to provide the best available technologies. Every day in our Labs we focus on the research of new technologies and the development of products tailored to the customer. A big effort is devoted to the development of products from renewable sources.

Metal Degreasers

- Low foam alkaline and neutral degreaser for different plants: tunnel, high pressure tunnel, ultrasonic
- Low foam Alkaline degreaser zero surfactants
- Neutral cleaners with high anticorrosion power
- Multimetal degreasers

Detergents for industrial facilities

- Alkaline degreasers for pressure washers
- Neutral shampoo for cabins
- Specific cleaner for bitumen
- Descaling concrete mixers

Degrease for machines and surfaces

- High concentration degreasers
- Universal cleaners
- Cleaners for machine tool
- Low foam degreaser for floor washing machines

Surface treatments special products

- Stainless pickling gel
- Inhibited acid for deoxidation
- Metal surface passivators

Products for the hygiene of the operators

- Hand washing cream with microspheres
- Hand washing shampoo with softening action
- Neutral hand washing shampoo
- Sanitizer gel approved by the Ministry of Health

Additives

- Silicon based antifoam
- Silicon free antifoam
- Sanitizers
- Degreasing booster
- Corrosion inhibitors
- Chelating agents

Solvents

- Hydrocarburic based:
 - High evaporation rate
 - Medium evaporation rate
 - Low evaporation rate
 - NO V.O.C.
- Stabilized Dibromo methane
- Ester based
- Glycol based
- Tailored mix
